***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, directed to a method, program and apparatus for predicting whether an organic compound will penetrate the blood-brain barrier, classified in class 702, subclass 19.
- II. Claims 14-23, directed to a method and program for analyzing a compound based on a partitioning property and sum of hydrogen bond donors/acceptors, classified in class 702, subclass 30.
- III. Claims 24-39, directed to a computer-readable medium and apparatus for defining a space, classified in class 703, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

None of the Groups is related. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the method and/or devices of each Group are directed to different results and recite different method steps or functional limitations. The apparatus/device of any one Group is not limited to be capable of use, or to be one used in, the method of any other Group. The method of Group I recites different method steps than the method of Group II and would be expected to produce different results.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Further, because these inventions are distinct for the reasons given above and the search required for any one Group is not required for any other Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marjorie A. Moran whose telephone number is (571) 272-0720. The examiner can normally be reached on Mon. to Wed, 7:30-4; Thurs 7:30-6; Fri 7-1 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward can be reached on (571)272-0722. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
